

Check a Box. Save a Life.

Description

Check a Box. Save a Life. The global student movement to make health care better and safer brings you the first student-produced Patient Safety App!

AMSA Best Practices - There's an app for that!

Free from the App Store - **Check a Box. Save a Life.** The first patient safety iPhone app produced by and for student leaders!

Checklists save lives, bring this app with you to ensure your patients safer care. Featuring the WHO Surgical Safety Checklist, as well as tools for safe handoffs, inpatient medical care, and central lines, this handy tool can help you make

sure things are done right each time.

Customize these checklists to suit your hospital setting, or create your own!

Track your usage to see the impact you're making - 143 uses of the WHO Surgical Safety Checklist = one life saved!

Email your creations and numbers to friends and colleagues!

This app is for any health profession student who wants to be sure that they get care right each time. Use it to save lives, prevent needless suffering, and cut health care costs in your hospital.

Thank you for taking the lead for better, safer health care!
