

3 Ways to Reduce your Environmental Impact at UConn Health

1. Put garbage in its place

- Utilize centralized waste baskets (such as staff kitchen areas).
- Be sure to dispose of your recycling in the appropriate bins. UConn Health's are typically blue and/or have the recycling emblem on them.

2. Ditch single-use products

- Use the ice/water dispensers in clinical areas and filling stations in the cafeteria. Bottle filling stations can be found across campus:
 - Munson Road, 4th floor
 - L Building, Basement (outside of Library)
 - Inside of Library
 - Academic entrance, Ground floor
 - Academic Building, Main floor (above main entrance)
 - C Building, Main floor (by three bank elevators)
 - West Dock entrance, Basement floor
 - Occupational Health waiting room
- Bring your own utensils and refillable food containers to work and wash them at home.

3. Choose sustainable transportation

- Consider riding your bicycle to work or carpooling. Bike racks can be found across campus:
 - Garage 1, Level 1 entrance
 - Garages 2 and 3, bottom of Level 1 near the stairwell
 - 195 and 400 Farmington Avenue
 - Under the Academic Rotunda
 - L Building (PD) entrance
 - In front of the MARB building
- Electric Vehicle (EV) Charging Stations are located on Level 1 of Garage 1. Note that these chargers are being replaced and additional chargers will be installed later this year in Garages 1, 2, and 3.
- Use our [campus shuttles](#) instead of your car to get around or walk!
- Avoid idling your car longer than 3 minutes- it's the [law](#)!

DID YOU KNOW?

Environmental Sustainability is one of The Joint Commission's [strategic priorities](#)

UConn was ranked as the [9th most sustainable university in the world](#) by UI Green Metric

Special thanks to UConn Health's Sustainability Working Group for their collaboration and contribution to this flyer!
